12/10/2026, 22:49 Untitled0.ipynb - Colab

```
# Python Program to convert temperature in celsius
# to fahrenheit

# change this value for a different result
celsius = 37.5

# calculate fahrenheit
fahrenheit = (celsius * 1.8) + 32
print('%0.1f degree Celsius is equal to %0.1f degree Fahrenheit' %(celsius,fahre
```

```
37.5 degree Celsius is equal to 99.5 degree Fahrenheit
```
