Python | data.csv

```python
import pandas as pd

df =
pd.read_csv('data.csv'
)

x =
df["Calories"].mode()
[0]

df.fillna({"Calories":
x}, inplace=True)

print(df.to_string())

#As you can see in row
18 and 28, the empty
value from "Calories"
was replaced with the
mode: 300.0
```
